Chase Field 2 Power Troubleshooting Tips

The purpose of this document is to provide a series of steps to follow in the event that the power to the pitching machine on Field #2 (Pinto) fails.

If the power to the pitching machine fails (for some reason) please attempt the following, in order:

1) There is a 60 minute timer at the base of the scorekeeper table (along 1st base side). Make sure that the timer has not run to zero. If so, reset the timer to the appropriate amount of time. 60 minutes is the maximum time.

If this doesn't work.....

2) Verify that the pitching machine is still turned on, and that the power cord is plugged into the electrical outlet in the ground behind the mound.

If this doesn't work.....

3) Check the "reset" button near the electrical outlet that the cord is plugged into. It's "ivory" color and states *reset*.

If the power still does not work.

4) Call the Park's department at 434-2825 (before 4pm Monday through Friday).

* If after 4pm Monday through Friday or on the weekends please contact the Harding Center at (760-602-7513) or the Harding Duty Cell# (760-213-5875).
